OUR STORY

ESTABLISHED IN 1926: OUR 100 YEAR LEGACY

Founded in 1926 by engineer Hugo Weimer, the H.W. Weimer Company played a pioneering role in the development of the v-belt drive system – an innovation that would revolutionize machine design and power transmission. As demand for other industrial components increased, our company evolved and was renamed Weimer Bearing & Transmission, reflecting our ever increasing range of products and industrial expertise.

FAMILY OWNED AND CUSTOMER FOCUSED

Fast forward to today, Weimer continues to be a trusted partner in industrial distribution. We are one of the largest privately held and independent suppliers in the United States, spanning 11 states with over 35 stocking locations. Continuing to grow, Weimer has expanded its range of products to include mechanical, electrical, pneumatic and hydraulic components. Our expert sales team is committed to providing our customers with prompt solutions and outstanding technical support.

HYBRID SUPPLIER AND MANUFACTURER

Unique to industrial distributors, Weimer provides extensive in-house capabilities and services including machining and fabrication, UL panel building, hydraulic and pneumatic system manufacturing, gearbox build centers, conveyor belt fabrication, and industrial hose assembly. These services allow us to deliver fully engineered and assembled solutions for our customers, saving both time and resources.
